Nova Scotia Fishery

1998

Preface

The Nova Scotia Fishery Statistical Overview provides the most recent available (April 2000) analysis of the Nova Scotia fishing industry for 1998.

The various aspects of the fishery are arranged into three broad areas: Economic Impact, Landings and Values and Exports. Maps and graphs are included to enhance and clarify the statistics.

The overview has been prepared by:
Marketing Division
Nova Scotia Department of Fisheries and Aquaculture. Sources of information include Statistics Canada, Department of Fisheries and Oceans (Halifax, Moncton and Ottawa) and the Nova Scotia Department of Finance.

1998

Economic Impact

Gross Domestic Product

Gross Domestic Product is the total money value of all final goods and services produced in an economy over a one year period. "Double counting" is removed.

For example, the market value of seafood products in Nova Scotia was approximately $1,027 million in 1998. In determining G.D.P. of the fisheries sector, such things as the cost of packaging material (assume around $20 million) is subtracted from the market value. This $20 million is then added to the packing sector. This is done for all goods and services purchased for the fishing industry.

In 1998, the fishing industry again placed first among the primary resource sectors. Employment figures associated with G.D.P. show fisheries slightly decreased. The profile of Nova Scotia Fishery employment, as provided by the Statistics Canada Labour Force Survey, shows a slight employment increase in the harvesting sector, but a decline in the processing sector.

Nova Scotia Fishery

1998

Landings and Values

In 1998, although Nova Scotia fish landings showed a slight decrease in metric tonnes, the value of landings has shown a 9% increase from 1997.

The value of the aquaculture industry increased this year to $25.4 million.

Preliminary landing figures for Canada indicate that Nova Scotia has the highest landings in both metric tonnes and dollar value. Lobster ranks #1 in value with having landed $233 million; Scallops rank second, at $67 million.

Please keep in mind that these landings and values are <u>preliminary</u> and can be subject to change.

PRELIMINARY Landings for Nova Scotia 1997-98

Nova Scotia Fishery

1998

Exports

Fish exports in 1998 accounted for 26% of all Nova Scotia exports and is still the largest of all product groups.

In 1998, Nova Scotia exported world-wide to 63 countries, United States being our largest importing country.

The Nova Scotia fishery exports are ranked by dollar value. These tables will show you the countries we export to and the products our industry sells. Also included is a comparison to other provinces in Canada - Nova Scotia being the top province, with British Columbia close behind.
